1. Uvod

Na narednim stranama tehničke dokumentacije ću detaljno pisati o korišćenim programskim jezicima, funkcionalnosti sajta, o samom templejtu, korišćenim CSS fajlovima, opisu funkcionalnosti sa priloženim slikama i na kraju o kodovima.

1.1 Korišćeni programski jezici

Programski jezici koji su korišćeni prilikom izrade ovog sajta su:

- HTML
- CSS
- JavaScript
- jQuery
- jQuery Plugin

Sajt je urađen u programu Visual Studio. Biblioteke JQuery, Owl carousel, Lightbox i Bootstrap su korišćene i one su sledeće: jquery v3.5.1, Owl v1.3.3, Lightbox v2.9.0 i Bootstrap v4.5.2

1.2 Opis funkcionalnosti

Intro sadrži naslov i podnaslov sa dugmetom koje vodi na sledeću sekciju. Prilikom prvog dolaska na web stranu se pojavljuje modal u donjem desnom uglu koji poseduje promo kod koji se šalje u email-u. Sa desne strane sa nalazi navigacioni meni koji se dinamički učitava pomoću JavaScript-a. Pritiskom na jednu stavku se odlazi na tu sekciju uz animaciju. Sav tekst je ispisan pomoću JavaScript-a.

Services sekcija sadrži detaljniji opis salona i dugme koje vodi na sekciju portfolio. U desnom delu ove sekcije se nalaze vrste usluga koje ovaj salon pruža. Pritiskom na show more dugme se dodaju još dve usluge. Ovo je rađeno pomoću native JavaScript-a. Pritiskom na jednu od usluga se otvara modal u kom se može pročitati više o samoj usluzi. Za modal je korišćen jquery plugin, tačnije Bootstrap biblioteka koja sadrži modal u sebi. Sav content je ispisan pomoću JavaScript-a.

Portfolio sekcija sadrži galeriju koja se nalazi u carousel-u. On se sam pomera ali ga je isto moguće pomerati pomoću navigacionih tačkica u dnu kao i pritiskom i prevlačenjem u jednu stranu. Pritiskom na jednu stavku se otvara Lightbox jquery plugin galerija. Za carousel je korišćen Owl-carousel. Sav content je ispisan pomoću JavaScript-a.

Pick your favorite color sekcija sadrži paletu boja sa svg slikom. Pritiskom na neku od boja u paleti boja noktiju se menja, kao i boja gornje margine slike da se vidi koja je boja odabrana. Na hover boje se može videti njeno ime. Ovo je urađeno bez pomoći plugin-a, koristeći samo jquery. Pritiskom na dugme ispod slike se stranica skroluje na sekciju forma i textarea se ispunjava sa tekстом u kom se navodi ime boje. Sav content je ispisan pomoću JavaScript-a.

Contact us sekcija sadrži formu. Forma ima validaciju sa regex-om na name, email i date polju. Validacija ima više poruka da bi korisnik znao šta se od njega očekuje. Takođe sadrži radio button da se izabere prepodnevni ili poslepodnevni termin. Prilikom aktivacije checkbox-a u dnu forme se pojavljuje polje za promo code. On se može iskoristiti samo jednom, nakon toga se modal neće više pojavljivati prilikom refresh-a strane. Ukoliko user čekira to polje aktivira se validacija i na tom inputu, u suprotnom nema validacije za taj deo. Sva polja su obavezna sem textarea polja jer zamišljeno je da nakon slanja forme dogovor bude postignut putem email-a zbog dužine samog termina. Kada su svi podaci pravilno ispunjeni pojavljuje se custom recaptcha za proveru da li je korisnik robot. Ukoliko rezultat unetog zbira nije pravilan forma neće biti poslata. Tek

kada je zbir dobar forma će biti poslata i korisnik će dobiti poruku potvrde. U nastavku ove sekcije se nalazi google mapa.

My story sekcija sadrži više informacija o samom autoru. Koristi se Bootstrap tabs da bi se prikazao timeline.

Footer sekcija sadrži linkove ka društvenim mrežama, fajlove koji su relevantni za web stranicu u levom uglu i hiperlinkove stranice u desnom uglu.

1.3 Template

Za izradu aplikacije je korišćeno gotovo CSS rešenje sa sledećeg linka.

<https://templatemo.com/tm-526-vanilla>

Izvršene su velike promene na CSS-u. Rađeno je sve u istom CSS fajlu zbog brzine učitavanja, pa prilažem CSS fajl u nastavku.

1.4 CSS

```
* {  
  user-select: none;  
}  
  
p {  
  font-size: 15px;

2 Organizacija

2.1 Organizaciona šema

Organizaciona šema ne postoji jer je aplikacija single page.

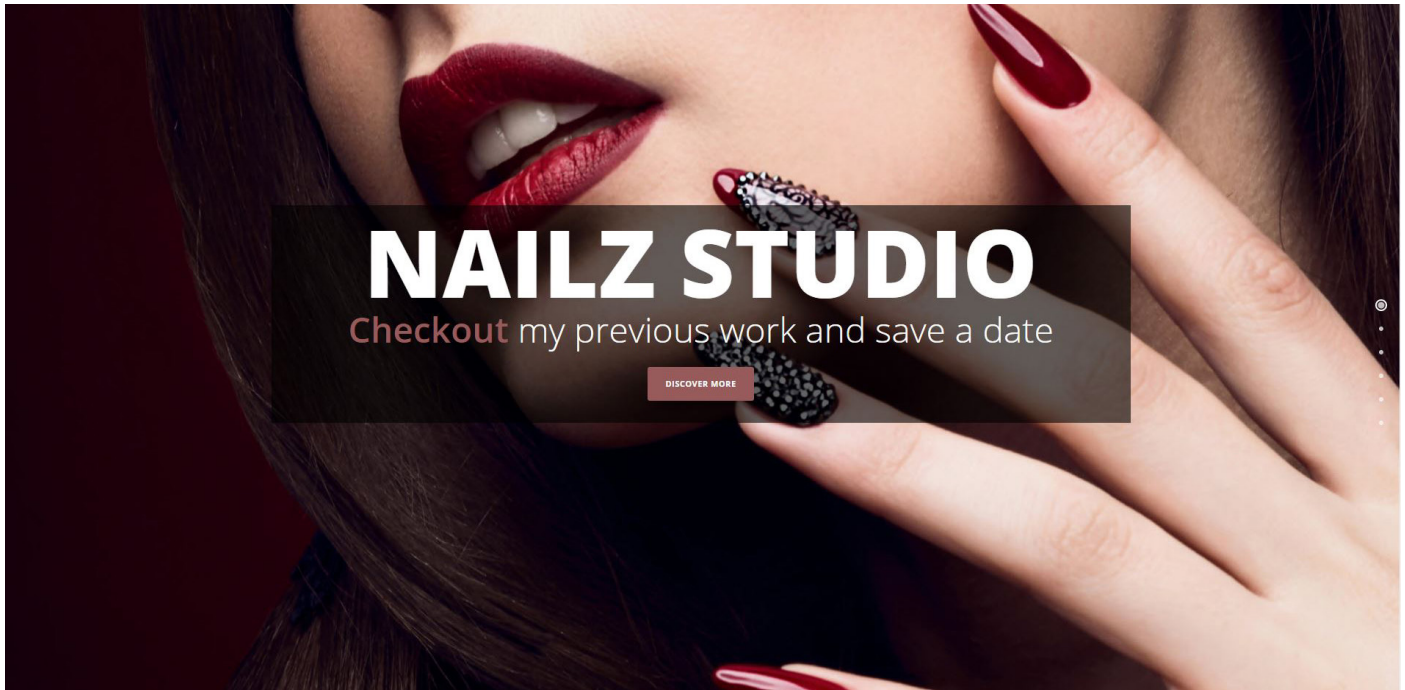

2.2 Mapa sajta

```
<?xml version="1.0" encoding="UTF-8"?>
<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9" xmlns:xsi="http://www.w3.org/2001/
XMLSchema-instance" xsi:schemaLocation="http://www.sitemaps.org/schemas/sitemap/0.9

    <lastmod>2021-01-27T21:42:20+00:00</lastmod>
  </url>
</urlset>
```

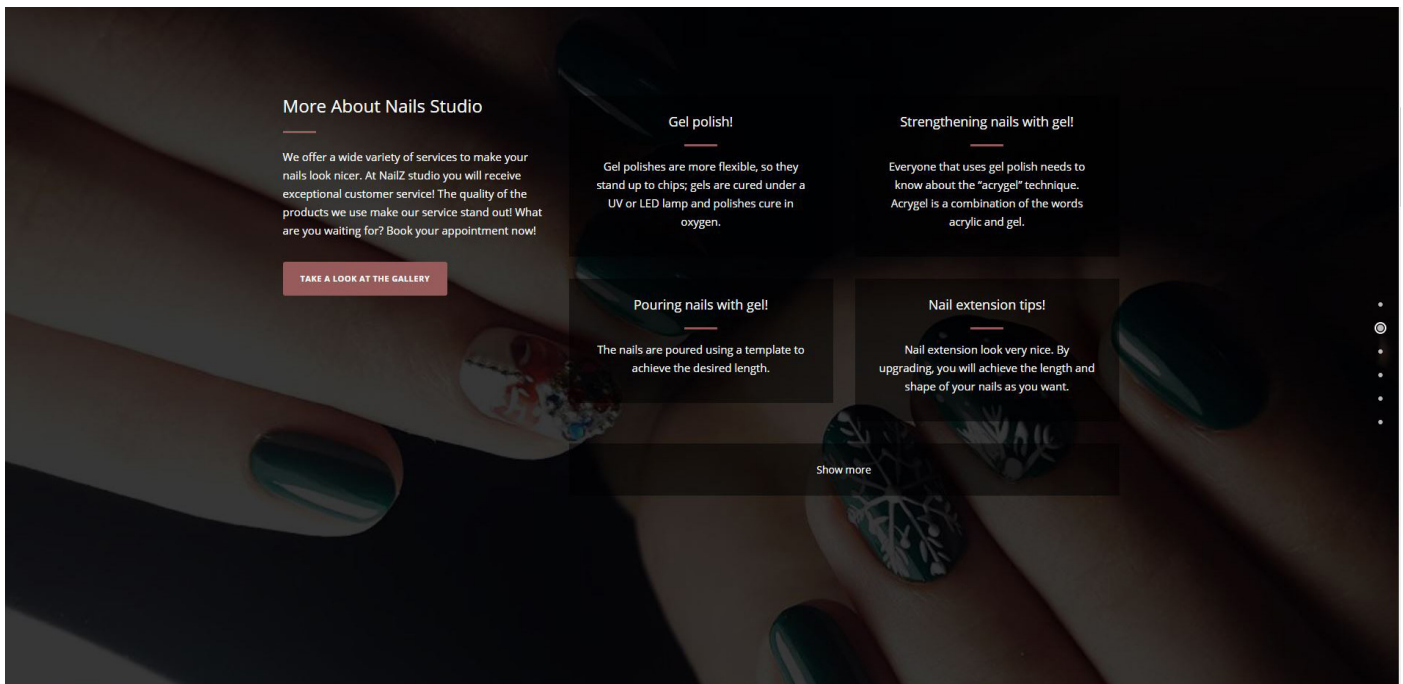

2.3 SEO

Što se tiče SEO optimizacije obraćena je pažnja na description, keywords, title. Prilikom testiranja SEO optimizacije keywords se ne poklapaju sa content-om jer je korišćen JavaScript za popunjavanje sadržaja što nije dobar pristup u ovom slučaju. Favicon je dodat za sve uređaje. Svaka slika ima svoj alt atribut. Obraćena je pažnja i da slike imaju dve verzije, manju i veću za galeriju. CSS i JS su minifikovani da bi se dobilo na brzini. Ubačen je GTAG za google analitiku koja se takođe preporučuje za SEO optimizaciju. Postoji sitemap i robots. Broj JS fajlova je sveden na minimum.

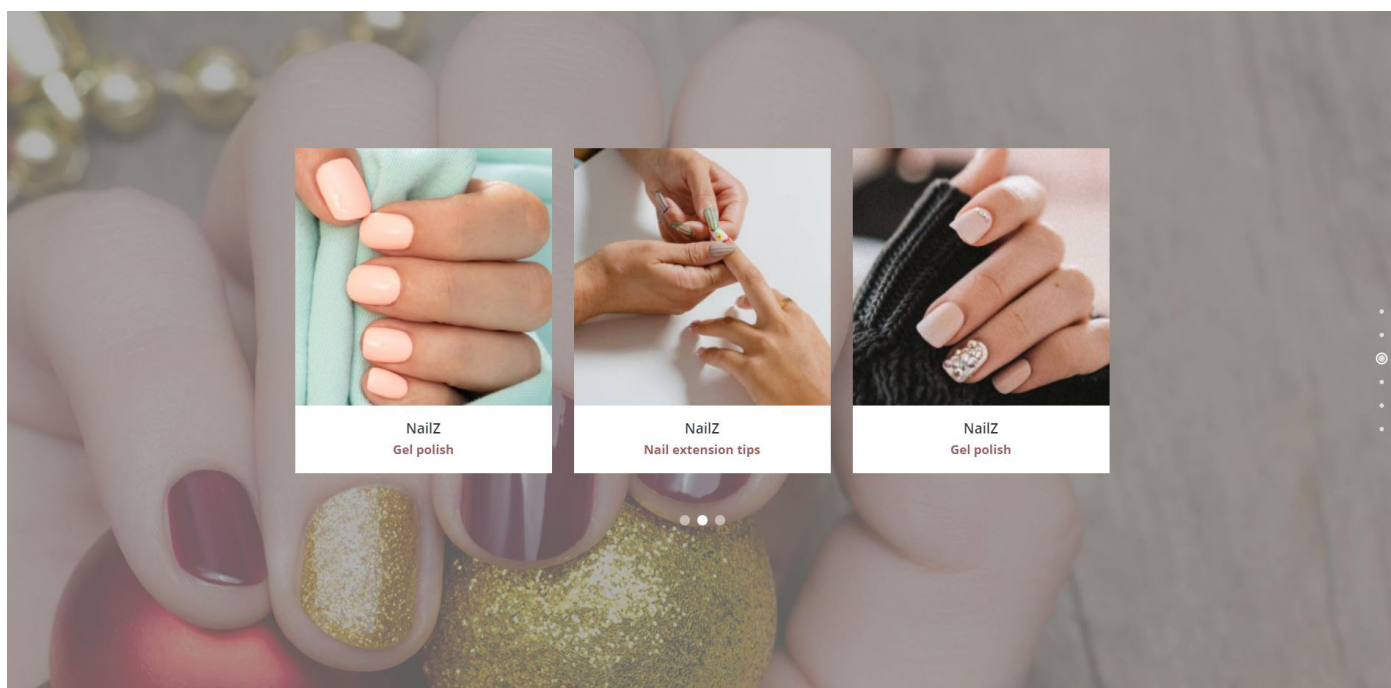

2.4 Funkcionalnost

Intro sekcija sadrži naslov, podnaslov i dugme koje vodi na sledeću sekciju. Sa desne strane se nalazi navigacioni meni. Pritiskom na dugme ili navigacioni meni se uz animaciju prelazi na datu sekciju. Sav content je dinamički generisan.

Services sekcija sadrži opis salona sa dugmetom koje vodi ka galeriji. Desni deo sekcije je spisak usluga koje salon nudi. Pritiskom na jednu od usluga se otvara modal u kom je slika i više informacija. Show more prikazuje ostatak usluga koje trenutno nisu vidljive. Ako su sve vidljive show more postaje show less i novi servisi se brišu. Manipulacija podacima je rađena pomoću JavaScript-a. Sav content je dinamički generisan.

Portfolio sekcija sadrži owl carousel sa lightbox pluginom koji prikazuje galeriju. Carousel se može pomerati pomoću navigacionih kružića ili prevlačenjem. Sav content je dinamički generisan.

Choose your color sekcija sadrži paletu boja i svg sliku ruke. Pritiskom na neku opciju iz palete boja noktiju i trake iznad slike se menja u datu boju. Ovo je urađeno pomoću jQuery-ja bez eksternih biblioteka. Pritiskom na dugme ispod slike se aplikacija skroluje na formu i textarea je popunjena tekстом koji u sebi sadrži selektovanu boju. Sav content je dinamički generisan.

The image shows a contact form for 'Nails studio' overlaid on a background image of hands with manicured nails. The form has the following fields and elements:

- *Your name... (Error: Your name is missing!)
- *Your email... (Error: Your email is missing!)
- Tell us what you want...
- *Save a date... (Error: Date is missing!)
- Time selection: ☐ A.M. ☐ P.M. (Error: Please, select morning or afternoon apointment!)
- ☐ With promo code
- Enter your promo code... (Error: You didn't enter the promo code!)
-

A modal box on the left side of the form contains the following information:

- Send promo code via email for 20% off on the first appointment
- Promo code: 76vcf
-
-

At the bottom of the form, there is a map snippet showing the location of 'Nails studio' near 'VILADA 84' and 'Mar&Co'.

Contact us sekcija sadrži formu sa regex-om i ostalom validacijom polja. Sva polja sem textarea polja su obavezna. Svako validirano polje daje jasnu poruku korisniku da zna šta se očekuje od njega. Pritiskom na save a date input se otvara jQuery datepicker gde se bira datum. Radio button mora biti selektovan zbog jutarnjeg ili popodnevnog termina. Ukoliko je checkbox u dnu aktivan, pojavljuje se još jedno polje koje se potom validira. Ukoliko nije aktivan to polje se ne uzima u validaciju. Promo code se može iskoristiti samo jednom i nakon toga checkbox se više neće pojavljivati kao ni modal. U modalu postoji dugme za zatvaranje istog ali ukoliko se kod ne iskoristi on će se prilikom svakog dolaska na aplikaciju pojavljivati. Dugme copy služi za kopiranje promo koda i nakon toga se može uraditi paste u input namenjen za kod. To je urađeno pomoću skrivenog inputa. Nakon što je forma validna pojaviće se overlaz koji sadrži jednačinu kojom se potvrđuje da korisnik nije robot. Ako je rezultat ispravan forma je poslata. Ako rezultat nije ispravan korisnik može ponovo da pokuša.

About me sekcija sadrži Bootstrap tabs u kom se može videti više informacija o autoru. Sav content je generisan dinamički pomoću JavaScript-a.

Footer sekcija sadrži linkove ka js, css, i ostalim relevantnim fajlovima za ovu web stranicu. U sredini se nalazi dugme za povratak na početak i dugmići za socijalne mreže a na desnoj strani se nalaze hiperlinkovi ka delovima stranice.

/*
Show context menu for image on right-click
```

There is a div containing the navigation that spans the entire image and lives above of it. If you right-click, you are right clicking this div and not the image. This prevents users from saving the image or using other context menu actions with the image.

To fix this, when we detect the right mouse button is pressed down, but not yet clicked, we set pointer-events to none on the nav div. This is so that the upcoming right-click event on the next mouseup will bubble down to the image. Once the right-click/contextmenu event occurs we set the pointer events back to auto for the nav div so it can capture hover and left-click events as usual.

```
*/
